EHS Setup

Use the EHS setup below to automatically answer a desk phone call by pressing a button on your Savi 700 Series or CS500 Series headset or MDA200 or Voyager Legend CS.

NEC MODELS: DT 330/430, DT 730, DT 750, DT830/830G

SETUP

CONFIGURATION

Install the ringer detect device on the phone over the speaker, under the handset. This is then plugged into the socket mounted midway along the audio cable. Supports only DT700/300 Series. Please contact NEC for more information.

Note: Disconnect the phone from the network cable prior to installing the EHS cable. Insert cable 'A' per diagram, and install the plastic flap included with the APN-91 cable, per the diagram prior to reconnecting the network connection. Please wait 20-30 seconds after all connections are made before pressing the headset button to make a call. Please contact NEC for more information.

*The NEC DT Series phones come in 2 versions, the std SIP (used with NEC product SIP@NET and 3C) and the i-SIP/N-SIP versions which are used with the SV8100, SV8300 and SV8500. The APN-91 only works with the i-SIP/N-SIP versions of the DT700 terminals.

For phone set-up, please refer to your specific phone manufacturer's instructions.
