

KONFTEL C2055

All included

Konftel C2055 is the perfect video collaboration solution for medium-sized meeting rooms, combining the Konftel Cam20 4K conference camera and the Konftel 55 speakerphone with OmniSound® audio quality. The Konftel OCC Hub brings everything together into one convenient kit, so a single USB cable is all you need to connect the camera, the audio device and the room's screen to the collaboration app on your laptop.

The Konftel Cam20 is optimized for situations where the conference cam needs to be positioned close to the table, but it is equally at home in medium-sized meeting rooms. The 105° field of view means that all the participants can sit in a comfortable position and still fit into the video image. At the same time, the camera creates a realistic image with no distortion.

SEE OTHERS, AND YOURSELF

If you have an extra screen, you can connect it directly to the camera's HDMI port, while the video image is being transmitted to the meeting via USB. This gives you a monitor that shows your side of the transmission in the room at all times.

LOSSLESS ZOOM

4K video resolution allows for a great digital zoom. Even at the maximum 8x zoom, the camera is still perfectly capable of producing a detailed image. So choose the framing you want to show and let the camera do the rest.
