

# ErisStation™ Conference Phone with Wireless Mics

## VCS704A

### \* Optional Accessories

- Wireless microphone
- Rechargeable battery pack

### A Revolution in Audio Conferencing

Take your conference calls to a new level with VTech ErisStation VCS704A. Unlike traditional conference phones, ErisStation allows everyone to spread out and stay engaged. Wireless technology, cutting-edge sound quality and all-in-one design make it the ideal solution for every size conference room.

### VTech Orbitlink Wireless Technology™

VTech ErisStation VCS704A features 4 portable DECT microphones with Orbitlink Wireless Technology, making conference calls more flexible and engaging than ever before. Integrated digital mixing technology delivers unified audio quality. It fits for all kind of meeting rooms and all shapes of meeting tables.

### Loud-and-Clear Voice Quality

Continuous acoustic echo cancellation calculation enables full-duplex technology, which allows natural, two-way discussions to occur simultaneously—without audio clipping or fragmentation on either end.

### Interference-free Conferencing

Dynamic noise reduction (DNR) automatically eliminates distracting ambient noise for clear conversations that flow naturally.

### Integrated Communications System

Compact, all-in-one design makes it easy to keep everything together—no clutter, no hassle. A built-in charging station with magnetic bays ensures the microphones are charged and available for the next meeting.

### Key Features

- 2 central plus 4 wireless microphones to offer greatest autonomy to adapt in any conference rooms settings
- Loud speakerphone to let everyone can listen at every corner in the meeting venue
- Natural conversation with true full duplex
- Automatic microphones gain control to improve sound quality
- Outstanding call clarity by state-of-the-art echo and noise cancellation technology brings natural, free flowing conversations for productive and enjoyable conferencing
- Up to 8 hours wireless microphone talk time
- Up to 70 hours wireless microphone standby time
- Eliminates conference table clutter; delivers clear audio conferencing with no distractions
- Resists interference from mobile phones and other wireless devices thanks to DECT technology

With unique Orbitlink™ (4 wireless microphones) and two built-in microphones, VCS704A covers a wide range and offer greatest autonomy to adapt in any conference rooms settings.

It comes with 4 portable DECT microphones featuring Orbitlink Wireless Technology. Meeting participants can spread out and speak without having to raise their voices, regardless of conference room size.
